

Hikvision Video Intercom

See, speak to and let in your visitors, from home or from your phone

A Hikvision IP video intercom lets you see and talk to whoever is at your gate or front door, and open it with a touch, from the indoor monitor or from the free Hik-Connect app on your phone. The door station and monitor are powered and connected over a single network cable (PoE), giving a clear, reliable picture and sound, and the system can be linked to your Hikvision CCTV cameras.

Why our customers choose Hikvision

- **Answer from anywhere**
Calls from the gate come through to the indoor monitor and the Hik-Connect app, so you never miss a visitor.
- **Open the gate remotely**
Let visitors, deliveries and family in from the monitor or your phone, wherever you are.
- **Keypad entry**
Family and regular visitors can let themselves in with their own entry code.
- **Clear day and night**
A wide-angle fisheye camera with infrared lighting gives a clear picture, even in the dark.
- **Clear speech**
Noise suppression and echo cancellation make conversations easy, even next to a busy road.
- **Messages and snapshots**
The monitor stores visitor messages and captured pictures, so you can see who called while you were out.
- **Works with your CCTV**
View live video from linked Hikvision cameras on the indoor monitor.
- **Tamper alarm**
The door station raises an alert if anyone tries to tamper with it.

The system

Every system is designed around your property. These are the parts we fit most often.

Door station with keypad

- Video intercom and access control in one
- Fisheye camera with infrared night lighting
- Keypad for entry codes, with an indicator module
- Modular: up to 8 sub-modules, with name tags
- Noise suppression and echo cancellation
- Tamper alarm

7 inch indoor monitor

- 7" colour touch screen (1024 × 600)
- Simple, user-friendly menus
- Powered over the network cable (PoE), with Wi-Fi
- Stores messages and pictures on a memory card
- Unlock the gate or door with a touch
- Live view of the door station and linked cameras

Hik-Connect app & more

- Answer calls and open the gate from your phone
- See who called and when
- Add more monitors or door stations later
- Choice of door station and monitor styles
- Links with Hikvision CCTV systems

Installed, programmed and maintained by Wealden Security Systems

We design the system, fit it, set up the Hik-Connect app on your phone and show you how to use it. All parts carry a 24-month warranty.
